"THE GAME'S UP"

CLARESHOLM LOCAL NEWS

Baseball will be in full swing next week. The diamond is said to be in fine condition.

Mrs. Dunn left on Thursday to spend the Easter holidays with her daughter at Calgary.

A fine rain on Monday did a lot of good in this district. The wind and dust storm on Thursday didn't do so much good.

Mr. and Mrs. A. Adams of Portage la Prairie, Manitoba, have returned to Clareholm and will again make this home.

Pte. Dick Gardner is expected home this week. He has been in France and Germany for the past two years. He was a prisoner in Germany for about a year.

A small audience greeted the Castle Square Entertainers last Saturday evening. They put on a high class entertainment that was worthy of a better support.

The next baseball game will take place on Easter Monday, April 21st. This is the game that was postponed from Good Friday. Come out and help boost the club's finances.

Seeding has made good progress in this district this week. The farmers around Meadow Creek report a large acreage in J. J. Vance has over 250 acres of wheat in and expects to finish this week.

The Odd Fellows will attend church service at the Methodist church on Sunday evening, April 27th. All members of Foothills Lodge and all visiting brothers are requested to be present. Meet at the lodge room at 6:30 and march to the church.

Get your furs repaired now, as I expect to leave Canada before fall. Bring me your fur coats for lining and all other things if you wish me to do them. Sent by parcel post, plain directions, your work will be done just as good as if delivered in person. Will sell good reliable tanning receipts for home use on furs, sheep pelts, lace leather, plain directions. Anyone can tan good soft fluffy furs and leather. Open season on beaver on own farm. Tan them yourself.—Mrs. Addie M. Irish, at old stand the furniture building.

Considerable excitement was caused in the neighborhood of Carl Milnes' farm on Wednesday evening when the little three year old son of an Austrian who works on the farm was reported lost. The child strayed away about 8:30 in the evening and no trace of him could be found. All the available help in the neighborhood was summoned and a number from town joined in the search, but it was not till 2 a.m. Thursday that he was found. Then Mr. Milnes on his way to town in his car to get more help found the little one sitting asleep by the roadside two miles from home on the Star Line road, and restored him to the distracted parents.

The Young People's Missionary concert which was held in opera hall last Wednesday was a surprise both from the quality of the entertainment as well as the size of the audience. Standing room was at a premium and the generous applause showed how well the various selections were appreciated. The drill by a number of girls dressed in white was really beautiful and there was not a misstep in the whole performance. The dialogue by a number of young ladies presenting the voices of women of different lands was very impressive and instructive. The collection netted about \$40.00 which will be devoted to the Women's Missionary Society funds.

CLARESHOLM SCHOOL FESTIVAL

The Second School Festival will be held in the assembly hall of the school Friday evening April 25th, at 8 o'clock. In order to finance the Festival, i.e., to buy prizes for the winners, print programs, etc., it has been found necessary to charge an admission fee of 50c for adults and 25c for school children who are not competitors. This has been found to be a more satisfactory way than that of soliciting prizes from the residents of the town. Special prizes have been given, however, by Mrs. Reinecke (Art), Mr. Godley (Recitation), and Mr. Moffatt (Music).

Preliminary tests will be held early in the week, at which those desirous of competing may be tested, so that the evening performance of Friday will be given by the best in each class.

The art work will be on exhibition and visitors are asked to inspect the work in the school.

The following have agreed to adjudicate the events:

Music—Mrs. H. Strang MacCordell, Miss R. Ramsay, W. G. Moffatt.

Recitation—Mr. J. R. Watt, Mr. R. S. Law, Rev. Mr. Locke.

Art—Mrs. Reinecke, Mrs. Simpson.

Rev. Jos. Phoenix will be the chairman for the evening.

EASTER EXAMINATIONS

Grade IX.

Lucile Carey, 70 per cent. Violet Boniface 68, Jean Laidlaw 64, Anna Beatty 62, Orville Wilhite 58, Carl Crawford 58, Lorne Torgerson 58, Vera Elgin 57, James Clark 57, Helen Tillotson 56, Leonard Workman 55, Claire Sage 54, Jessie Mackenzie 53, Eldred Burnham 47, Lena Amundsen 46, Alice Whitehead 41, Hilary Leeds 40, Clive Butler 40, John Laidlaw 39, Lloyd Nowlin 39, Ray Mathews 35, Claude Nelson 34, Margaret Granahan 34, Earl Mathews 31, Alva Rice 29, Albert Dean Whitehead, Mary Emond.

No Departmental Examination will be set for this grade; the school examinations however will be held the latter part of June. A pass-mark of 33 per cent in each subject and 50 per cent of the total will be required of each student before promotion into Grade X will be granted. Parents are requested to examine the reports sent to each student. They will aid their children materially during the coming term by supervising the home-work of the students.

Grade X.

Nettie Benson 75 per cent, Herrold Chamberlain 70, Thelma Burnham 66, Ruth Annable 65, Annie Farrer 65, Oneta Nelson 64, Elsie Tallefen 63, Axel Butler 63, Katie Mackenzie 59, Morley Tillotson 57, John Farrer 53, Alma Buckingham 52, Alan Dickson 50, Kathleen Holmes 49, Veda Workman 46, Loris Hutton 52, Clare Scratch 40, Verle Johnson 32.

Grade XI.

Jean S. Brown 75 per cent, Arthur Haig 72, Flo Jackson 70, Harold Soby 69, Ethel Strangways 64, Minnie Holmes 63, Corine Vadaia 63, Jesse Lyndon 63, Ethel Amundsen 60, Amy Elverum 59, Alex Mackenzie 53, Beattie Holmes 43.

Grade XII.

Willard Haig 79, Ivan Nelson 74, G. R. Simpson 71, Norma Holmes 67, Eva Johnson 63, Jennie Morrow 53, Charles Lyndon 53, Loretta School 52, All Edlund 8.

Owen Williams, Principal.

ATTENTION! After sending have your photo taken at the Studio and send them to your friends. We have a good selection of mounts to choose from. Phone or call whether you want photos or not.

If Sleeplessness Is Your Trouble Read This

Sleeplessness is a warning of force at war within the body—all is not harmony—something needs correction.

Nine times out of ten the body is loaded with the poisons of half-digested and half-digested food. Brain and nerves are irritated, sleep is impossible.

No prescription ever formulated produces the rapid results of Dr. Hamilton's Pills.

They flush every impurity from the body, keep every organ working well, remove the evil effect of lost sleep and set you up in a few days.

Try Dr. Hamilton's Pills today. See how much better you feel, see how much easier it is to face the day's work.

Your blood is nourished, your nerves fed with new vital power, vigor and health is sent to every part of your system.

It's because Dr. Hamilton's Pills make each organ do the work Nature expects of it, because it causes harmony, health and vigor to the system, that it cures sleeplessness, languor, depression and nervousness.

Isn't there a reason why you should use Dr. Hamilton's Pills? Sold in 25c boxes by all dealers.

The Channel Tunnel Project

Start Can Be Made Immediately Government Reaches Agreement

London.—The prime minister and Mr. Clemenceau are discussing in Paris details concerning the construction of the channel tunnel. Plans for the work are so far advanced that a start can be made immediately the governments of the two countries reach a complete agreement on the scheme. A committee of experts is now advising the British government, and the points at present to be settled are:

Whether the construction shall be carried out by the government itself—as the national shipyards were built over the work given out to contractors.

The situation of the tunnel head upon the English side.

In connection with this second point plans have been drawn up, at the request of the government, by Mr. Tennant, the chief engineer of the South-Eastern and Chatham railway, showing alternative sites for the head of the tunnel, with its railway station, goods and traffic sheds, yards, and generating house, and general offices.

Several places are suggested, the one most favored being between Dover and Folkestone. Another is on the Ramsgate side of Dover, and a third not far from Folkestone. In each case the tunnel head is placed several miles back from the sea. The suggestions include taking advantage of the present borings of the Channel Tunnel company, which extend for a distance of over a quarter of a mile. The tunnel will not start at Dover itself. On the French side the tunnel head will be near Wimereux, between Boulogne and Calais.

A channel tunnel works office has been established by the South-Eastern company. Here the plans now before the government were prepared with estimates as to the probable cost in construction and detailed specifications completed.

The government intends also to seek the co-operation of the present Channel Tunnel company, particularly in reference to the very extensive geological surveys carried out by its officials. It is not considered likely, however, that the work will be made over to the company. The strong opinion is that the tunnel shall be owned and managed by arrangement between the two governments.

Borings will begin on both sides of the channel simultaneously. England will be responsible for one-half the work and France for the other, and there will be eager competition to see which nation can tunnel the greatest distance. Very careful scientific work will be carried out in aligning the tunnel, so that the twin borings will meet exactly. Two circular iron-lined tunnels will be run, each with an internal diameter of eighteen feet, and carrying a single line of rail. There will be cross connections at intervals of every 300 yards.

The gradient of the tunnel on the English side will be 1 in 54, gradually lessening until a level track is reached about four miles out. The greatest depth of cover will be at three miles from shore, where 120 feet of solid grey chalk will be above the tube. In mid-channel, where the sea is 165 feet

deep, the tunnel will be ninety-five feet below the water.

Electric drilling machines, specially made and working at high speed will cut the tunnel. A pilot drill will work in advance of the main drilling machine to give warning of any water-bearing strata that may be ahead. It is estimated that the tunnel can be driven and tube built at the rate of nearly one and three-quarter miles a year. This will make a total distance of three and a half miles a year, cutting from two ends.

Seven to eight years should, it is stated, see the twin tunnels completed, with connecting railway lines on shore and all the necessary buildings and power stations. That is unless unexpected difficulties are met with.

The number of men on this side working in the building of the actual tunnel will not be great, even allowing for four shifts in the twenty-four hours—not more than 200; but a very large number, running in to thousands, will find employment in the making of the connecting land railway lines and with the erection of buildings.

Special attention has been given to plans for ventilating the completed tunnels. Fresh sea air will be pumped down under pressure behind each train. The volume of air required to keep the tunnels fresh will be 45,000 feet on each line travelling at the speed of a light breeze. This constant stream of air will keep the temperature of the tunnel down to a comfortable warmth.

Electric locomotives are to draw trains through the tunnel, and the underneath channel rolling stock will be specially built. All the woodwork of the passenger trains will be rendered fireproof, and the windows are to be rubber cushioned so that rattles and noise can be reduced to a minimum.

The tunnels, three miles long, will be electrically lighted and constantly patrolled by a small garrison.

Sir Arthur Pell, M.P., of the house of commons tunnel committee, gives the following figures as the cost, fare, cost of tunnel, \$100,000,000.

Period of construction, five years. Fare each way, \$2.50.

Length of tunnel, thirty miles.

Distance under water, twenty miles.

Time in traversing tunnel, forty minutes.

"The tunnel," he said, "would run from a point near Dover to the village of Wissant, between Boulogne and Calais. The railway through it would be rendered fireproof, and the windows are to be rubber cushioned so that rattles and noise can be reduced to a minimum."

The tunnel, he said, "would run from a point near Dover to the village of Wissant, between Boulogne and Calais. The railway through it would be rendered fireproof, and the windows are to be rubber cushioned so that rattles and noise can be reduced to a minimum."

We believe the French government is quite prepared to allow the power operating the railway to be generated on this side (so that we would not have to pay for it) and to allow us the means at Dover of flooding the tunnel in case of emergency.

Allied Reinforcements Scare Reds
London.—There has been an improvement in conditions at Kandahar, at the base of the Kola Peninsula of the White sea, it is announced in an official dispatch from Marmansk under date of April 5.

A raising of the Finns, Karelians and Bolsheviks had been planned on a large scale, the account states, but the announcements that reinforcements for the allied troops were on the way and that other military preparations had been taken to meet the situation have overawed the leaders for the time being.

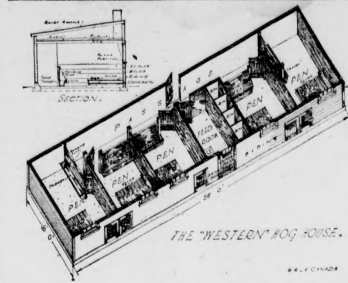

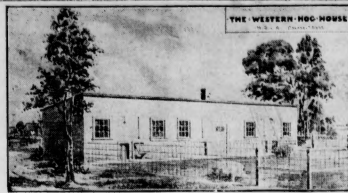

Food Controller Beaten
London.—Reuter's Bombay correspondent, under date of March 27th, says:

"Discontent among retail dealers in grain has resulted in rioting, two thousand dealers around with banners attacking the office of the assistant food controller, and assaulting that official."

"The police are holding an enquiry. No arrests have been made."

The board of education of Port Arthur has acquired the property at the corner of Red River road and Pine street for a new school site. The property has a frontage of 266 feet on Red River road and 477 feet on Pine street, and the price paid was \$8,950.

Ship Butted to New York
Winnipeg, Man.—Manitoba creamery butter is still being shipped to New York. L. A. Gibson, dairy commissioner, reports. A carload was graded and dispatched on its journey, realising about 60 cents per pound to the consumer.

Courtesy Western Retail Lumbermen Association Service Department.

Building moderns and well equipped farms and outposts undoubtedly calls for a larger initial investment, but in a very short time better housing pays for itself in better stock that brings greater prices. Growing stock under war conditions has taught the farmer the advantage to be gained from having all his equipment modern—and the lesson once learned is not likely to be forgotten.

Reds Executed in Poland

Charged With Plotting Uprising for Overpowering Wrecked Garrison

Warsaw.—Thirty-three Bolsheviks were executed at Plock, on the eastern frontier of Poland. They were charged with plotting an uprising for the purpose of overpowering the weakened garrison and seizing the city.

An allied commission, composed of British, French and United States representatives, is conducting the fullest enquiry and may send a special mission to Plock from Warsaw for that purpose. Some reports have been received Warsaw place the number of executions as high as 250, but Colonel Francisz Franczak, head of the commission of Buffalo, who was in Plock at the time for the American Red Cross, fixes the number at 33.

Plan Barns Better

Wisdom of Scientific Building Becoming Apparent

The farmer of yesterday—and there is an occasional one today—could design a barn good enough for his stock, if it were high bred and high priced. Bitter experience has taught the old-school farmer a lesson and showed him the tremendous fallacy of this idea.

One enlightening example may be cited from the many. A certain farmer not long ago invested \$100,000 in a state herd-splendid animal, every one of his barns, though large, were old fashioned and of his own design. But he figured that they would do, so he housed his herd therein.

The barns were drafty, the ventilation was inadequate, the drains were not properly placed, a hundred other shortcomings were apparent; and yet the stock was housed there. As a result of exposure, and inadequate ventilation, one of the herd contracted tuberculosis, which spread rapidly to its fellows. In less than a year the whole herd had to be condemned and killed—\$100,000 clear loss.

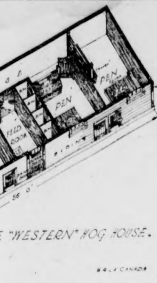

Now, with a market offering higher prices than ever before for live stock, with the consuming market voicing louder appeal for first class stock and first class breeding, the wisdom of scientifically planned barns that give animals the maximum of protection and provide for their health and comfort, becomes increasingly apparent.

Stock is subjected to almost as many ailments as humans. Too great exposure will sicken animals just as sickness human beings; stagnant air lowers vitality in cattle as quickly as in people.

The building of better barns, designed by men who make a study of housing conditions with reference to animals is nothing less than common sense for the farmer. Healthy stock is bringing high prices and will year to year; but the price of your stock can be kept up only as the health of the animals is maintained. To build your barns scientifically pays handsomely.

If a man can't make good at any thing else, he is apt to make good at raising stock.

THE WESTERN HOG HOUSE

Courtesy Western Retail Lumbermen Association Service Department.

Building moderns and well equipped farms and outposts undoubtedly calls for a larger initial investment, but in a very short time better housing pays for itself in better stock that brings greater prices. Growing stock under war conditions has taught the farmer the advantage to be gained from having all his equipment modern—and the lesson once learned is not likely to be forgotten.

The Joy Recipe!

Take Cascarets

Regulate liver and bowels, and sweeten the stomach—spend 10 cents and see

Enjoy life! Straggle up. Your system is filled with an accumulation of bile and bowel poison which keeps you sluggish, headachy, after-tongue coated, breath bad and stomach sour—Why don't you get a 10-cent box of Cascarets at the drug store and feel them take Cascarets tonight and enjoy the sweet, scummy, liver and bowel cleaning you ever experienced—Give Cascarets to children also, they taste like candy—Never again will you have a sick, bilious child ready to take this laxative.

The area included in Canada's forest reserves is 2,302,640 acres, according to the report of the department of the interior for the last fiscal year.

67 YEARS OF GROWTH

IN the early days the founder of this business made a few gross of matches a day, and sold them himself, driving his horse and wagon as far as Toronto. Today, from automatic machines, 70,000,000 matches a day are turned out to keep Canada's home fires burning. And not matches alone: indurated fibreware, household helps, and a host of paper products have been added to this line.

The House of Eddy

has become an institution which touches the daily life of the Canadian public in a thousand different ways.

There is a reason back of this steady and consistent progress. Business institutions do not grow to such proportions by accident. It takes real merit to accomplish such a result; merit in the goods themselves, and in the manner in which they are sold.

When you buy matches, see that Eddy's name is on the box. When you are in need of some of the familiar household helps, such as a washbasin, a pail, or a washboard, remember that there is an Eddy product which will fill your needs, made to the highest standard of quality and value.

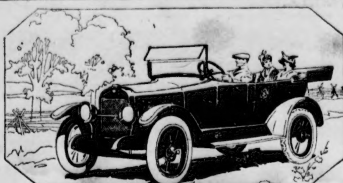

Remember also that Eddy's Paper Specifications are standard.

Our Prestige is your Safeguard when you buy Eddy Products

This Car Warrants Its Price GRAY DORT

There are many reasons for the price of a motor car. The car may be built down to a selling price. The price may be forced up to a profit mark. There may be weight, size, speed, that you do not need. But the Gray-Dort price is the lowest price at which a big, efficient organization can build a fine light car. The Gray-Dort is built right there. It is built with real big car quality and comfort and appearance. It is built to give you all the service you need, free from trouble. Then by factory efficiency the price is kept low.

So when you buy a Gray-Dort you are putting every dollar into real motor car value. Ride in a Gray-Dort—then you will see how greatly cheaper cars fall short of it—and how light cars higher priced give you no more or not as much.

The touring car is \$1245; the Gray-Dort Special—the car with added refinements and extra equipment, is \$1318 extra; there are also a coupe and a sedan. All prices f.o.b. Chatham and are subject to change without notice.

Notice to School Districts Desiring to Hold School Fairs Commencing in the Spring of 1919

The Department of Agriculture at Edmonton purposes giving assistance in the organization, management and financing of School Fairs through the School of Agriculture at Clareholm. This notice has reference to the territory in Southern Alberta extending from the main line of the C.P.R. south to the boundary.

Briefly, the plan is that a committee of interested citizens shall be organized at the centre at which it is proposed to hold a fair, which committee will share with the Department of Agriculture and Education the work and expense of the fair. A group of from eight to twenty-five schools convenient to the centre will be selected. Garden seeds will be distributed through the committee to the pupils of these schools. The pupils will plant the seeds at home, care for the gardens during the summer, and in the fall exhibit samples of the products at a fair. Girls will receive recipes and instructions in connection with the sewing and cooking that they will exhibit at the fair.

For further particulars apply immediately to

W. J. STEPHEN, Principal,
School of Agriculture, Clareholm.

FRIDAY, APRIL 18, 1919

THRIFT CAMPAIGN

An educative campaign in Alberta, for Albertans, for Alberta, was launched April 15 throughout the whole province. Its purpose is to tell the people of the province that without thrift Canada cannot recoup herself, and to tell of the wonderful thrift opportunities offered in Thrift and War Savings Stamps.

In three months, under the direction of the Alberta War Savings Committee, organizers have made it possible for one to buy Thrift and War Savings stamps almost anywhere, at any time, throughout the province.

Now under the same directorate, baby bond boosters will begin an intensive campaign of education. This will supplement the work of the Department of Information at Ottawa, and apply the thrift propaganda locally where it will have the greatest effect.

"Your ship will never come in if you never send it out," is one of the slogans under which organizers of the War Savings campaign are working.

How Every \$4 Helps

Four dollars, the price of a war savings stamp, is not much, but it will pay the wages of a competent Canadian artisan for one day. In these days when to provide employment at good wages is so necessary this is something. The more money that is placed at the service of the government through the sale of war savings stamps, the more credits will it be able to supply to other countries. Consequently the greater the trade that will come to Canada, and consequently the more Canadians will there be employed.

NOTICE—PUBLIC HEALTH ACT

All privies and privy-pits must be cleaned this spring. The Town has appointed W. Marsh Scavenger, to execute this work and has fixed a Tariff to be paid the Scavenger by all householders and others having this work done. The Schedule can be seen at the Town Office.

Parties refusing to allow the scavenger to clean privies or privy-pits or refusing to pay him his fee according to Tariff will be reported to the Council with a direction to assess the amount as taxes and recover the same.

By Order of the Board of Health.

C. J. Braren, Chairman
E. G. Barber, Secretary

Asparagus and Onion Culture

That luscious vegetable asparagus, available only in the spring and early summer months might readily be grown much more extensively than it is.

If properly prepared, that is well drained, a bed may remain for twelve or fifteen years and will improve during most of this period if properly looked after. One has to wait a couple of years for a crop after the bed is set out but the relief from planting, which is necessary with most crops, during succeeding years more than offsets this disadvantage. Asparagus culture is dealt within a practical way in Pamphlet No. 24 of the Central Experimental Farm which is available at the Publications Branch at the Department of Agriculture, Ottawa. In this pamphlet every culture is also taken up. The soil, growing the plants, planting, cultivation, blanching and storing are dealt with.

That appetizing vegetable the onion also occupies a place in this pamphlet which points out that the seed should be sown about one-half an inch deep in rows from twelve to fourteen inches apart at the rate of from four to six pounds of seed per acre. The Large Red Mottershead, Yellow Globe, Danvers, and Newburg Yellow Globe are recommended as suitable for the warmer sections of Canada. Early White Barletta and White Queen are suitable sorts for picking, while in the Prairie Provinces Extra Early Red or Early Flat Red give best results.

Spring is Here!**Have you had your car overhauled?**

It will only be a short time until you will be giving it a lot of hard work, and you can hardly expect it to go on year after year giving you good service, without having it gone over and the wear which is bound to develop taken up.

Now is the time to have this done, so the car will be in first class shape and in condition to give you the service you expect of it throughout the summer. Let us give you an estimate on putting your car in first class running condition.

How about a coat of Paint?

We have just received a large shipment of special auto finishings which are easily applied and will prove a very durable new finish to your car. This includes dressing for the leather upholstery as well as both mohair and leather top dressing.

Ask us more about this.

D. A. Anderson wishes to announce that he has now opened up again, in a modern well ventilated market, where every attention will be given to customers.

We are receiving fresh Halibut and Salmon every Tuesday and Friday morning direct from Vancouver. For Easter we have some fine Mutton and Lamb, and Prime Baby Beef.

Also in connection we have an excellent cooling system which is always below freezing, where cooked meats of all kinds are kept.

Phone orders promptly delivered.

Thanking you for past favors, Yours truly,

D. A. ANDERSON

Claresholm Local News

Fred Watkins was in Calgary on Monday.

W. S. Keeley was in Calgary on business the first of the week.

F. Downs has sold his new home near the school to J. R. Watt.

Geo. Poole of Happy Valley spent a few days in town this week.

Watch for dates, "Hearts of Humanity."

Mrs. H. J. Duffy and family left for Carstairs on Thursday morning.

J. Cheadle sold his farm on Saturday last to Ole Husted for \$55.00 an acre.

We have four good furnished rooms at \$8 per month without gas; \$10 with gas—Mrs. Irish.

Alex Bell brought two fine bulls down from the Calgary sale at Shorthorn and an Aberdeen Angus.

Watch for dates, "Hearts of Humanity."

A. M. Carlson, section foreman at Woodhouse, moved onto his farm nine miles west of Granum last week.

J. M. Halliday of the Bank of Commerce motored to Calgary on Thursday to spend his Easter holidays in the city.

F. Murray is building a garage on his property west of the Presbyterian church. He expects to soon commence his new residence.

I. Lepard and J. Reynolds arrived in town by motor Thursday of this week. They have been spending the winter in California.

Watch for dates, "Hearts of Humanity."

Two grandchildren of Mrs. Lyons accompanied Mr. and Mrs. Lewis from California. They will make their home with their grandparents.

Arndt Swanson and wife who have spent the past eighteen months at Stanton, Iowa, have this week returned to Claresholm district to reside.

J. W. Hallett is trying his hand at farming this year and is putting in his crop himself with a Moline tractor. So far everything is going well.

Pte. Dan Macleod returned home from the front on Wednesday. He left here two years ago and has been in some hard fights. He was wounded and lost the sight of his right eye.

R. L. Redfern has installed another chair in his shop and has engaged the services of Mr. Herb Bottomly of Calgary as his assistant. Clean shaves and good hair cuts are absolutely guaranteed.

Mayor T. D. Lewis, wife and daughter arrived home last Tuesday from California. The Mayor will find plenty to do to straighten out the water difficulty. Everybody was glad to see the mayor or home again.

Died, at Okotoks on April 15, Elizabeth Scott, wife of Alexander E. McKeller, age 87 years. The funeral service was held at the Presbyterian church, Claresholm, at 2 o'clock on Friday. Deceased was the mother of Mrs. Stewart, and was formerly a resident of Claresholm.

In connection with St. John's church, there will be a sale of home cooking and also of fancy work on Saturday, April 19th, from 3 to 6 o'clock, in the Parish Hall. Afternoon tea will be served. Price twenty-five cents. Everybody welcome.

Haig Tells How Victory Was Won

London. — Field Marshal Sir Douglas Haig in his dispatch, just made public, presents a view in detail of the expansion and achievement of the British army, and with remarkable facts and figures. He treats the operations of the western front as a single continuous campaign, in which can be recognized the same general features and necessary stages that, between forces of approximately equal strength, have marked all the conclusive battles of history.

"The high water mark of our fighting strength in 1916," says the British commander, "was only reached after two and a half years of conflict, by which time heavy casualties had already been incurred. It was not until midsummer, 1916, that the artillery situation became even approximately adequate to the conduct of major operations."

During the Somme battle, artillery ammunition had to be watched with the greatest care. During 1917, ammunition was plentiful, but the situation caused anxiety. It was only in 1918 that artillery operations could be conducted without any limiting consideration beyond that of transport.

"The margin with which the German onslaught of 1916 was stemmed was so narrow, and the subsequent struggle was so severe that the word 'miraculous' is hardly too strong a term to describe the recovery and ultimate victory of the allies."

"The breakdown of Russia in 1917 probably prolonged the war by a year, and the 'Salutary' situation in Italy in the autumn of 1917 necessitated the transfer of five British divisions to Italy at a time when their presence in France might have had far-reaching effects."

Sir Douglas recalls the interesting fact that more than half the British casualties in the fighting of 1918 occurred during the five months from March to July, when the allies were on the defensive.

"The rapid collapse of Germany's military powers in the latter half of 1918," he says, "was the logical outcome of the fighting of the previous two years. It would not have taken place but for that period of unrelenting attrition which used up the German reserves. It is in the great battles of 1916 and 1917 that all have to look for the secret of our victory in 1918."

The value of cavalry in modern war is emphasized by Sir Douglas Haig, and, in discussing the value of mechanical contrivances such as tanks, he observes that, immense as their influence might have been, they could not by themselves decide a campaign. Their true role is to assist infantrymen by whose rifles and bayonets one can decide victory or loss.

The expansion of British personnel, artillery, ammunition, transport, railway construction and establishment of every kind in France is dwelt upon by the field marshal. Regarding machine guns, the British expansion increased from one gun to 500 infantrymen in 1914 to one to twenty infantrymen in 1916. The 480 pieces of artillery, which the British took the field in 1914, were represented at the end of the armistice by 6,647.

On the first days of the Somme battle of 1916, nearly 13,000 tons of

Hungary Can Pay Debts

Paris. — The mission to Hungary headed by General Jan Christian Smuts, has reported on the prospect of the payment by Smuts of her debts. The impression gained by the commission, the report stated, was that there might be some chance of adjustment through friendly negotiations. Otherwise, it was added, it was difficult to see any chance whatever.

artillery ammunition were fired by the British on the western front. On two days, September 20 and 21, 1917, 42,000 tons were expended, and in the three days of the crucial battle on September 27, 28 and 29, 1918, nearly 65,000 tons were fired by the British artillery.

Sir Douglas says that the feature of the war, which to the historian may well appear most noteworthy, is the creation of the new British army, which was successfully built up in the very midst of the war.

"The total of more than 327,000 German prisoners captured by us on the western front," says Sir Douglas, "is in striking contrast to the force of six divisions, comprising some 80,000 fighting men, with which we entered the war. That we should have been able to accomplish this stupendous task is due partly to the loyalty and devotion of our allies and to the splendid work of the royal navy, but mainly to the wonderful spirit of the British race in all parts of the world."

Veteran Tells of a Terrible Experience

Before He Found Relief in Dodd's Kidney Pills

Postmaster of Hereford Points the Way to Health to Other Sufferers From Kidney and Bladder Trouble Hereford, Eng., April 14. (Special.) — Mr. P. B. Jones, one of the many old people who claim to have received a new lease of life through the use of Dodd's Kidney Pills.

Mr. Jones is in his 84th year, but wonderfully strong and active for his age. "But we were not always thus. For six years," he says, "I was in terrible pain. I suffered from kidney and bladder trouble. I had those sharp, stinging, lightning pains through my muscles, even to my finger tips."

"In March, 1917, I was taken with a shaking chill and deathly pains through my abdomen, groin, and the small of my back. I was confined to my bed for three weeks, during which time I was had to get up often at twenty or thirty times a day."

"I tried benefit till I tried Dodd's Kidney Pills. In three days I got relief, and three weeks later all the pain was out of my system. I also read that 'I am always glad to tell other sufferers from kidney and bladder trouble what Dodd's Kidney Pills did for me.'"

Write your neighbors about Dodd's Kidney Pills.

Newest Republic

London. — The proclamation of a Soviet republic in Salzburg, Germany, is reported in an Amsterdam dispatch to the Central News.

MAY FEED RUSSIA

£10,000,000 Monthly Required For Carrying Out of Problem

London. — Herbert Hoover, director-general of the inter-allied relief organization, has requested Dr. Fridtjof Nansen, head of the Norwegian food commission to the United States, to become chief of an international commission to investigate the possibility of feeding Russia on condition of the cessation of hostilities in Russia.

The dispatch says that £10,000,000 monthly will be required for the carrying out of the problem.

Amsterdam. — The visit to Paris of the Dutch financiers Van Den Hoven and Ter Meulen, a local news agency says, has reference to the conclusion of a loan by neutral states to Germany of \$200,000,000. The loan is to be made under the supervision of the allies, and is for the purpose of restoring the economic situation in central Europe. Swiss and Scandinavian bankers, it is added, are participating in the negotiations.

FARM LABOR SCARCE

Working Conditions and Wages Are Both Good

Winning. — There is a shortage of farm labor in the province this spring, it was learned at the Dominion-provincial employment service bureau here. There is much more demand for farm help than there is response, and J. A. Bowman, head of the bureau, said that requests for men had been sent to Vancouver and other Pacific cities as well as to St. John and Halifax.

Working conditions on the farms here are good, Mr. Bowman said, and farmers are paying \$60 and \$65 a month.

In British Soil

London. — Arrangements are being made, it is understood, for the removal of the body of Edith Cavell, the English nurse, executed by the Germans at Brussels in 1915, to this country. The internment of the body in British soil will be made the occasion of an extensive public ceremony.

Trouble in Egypt Takes Serious Turn

U. S. Credit to Belgium

Washington. — Credits of \$6,330,000 to the Czech-Slovak republic and \$900,000 to Belgium were established by the treasury. The Belgian credit raised the total loans to the allies to \$9,016,229,000, and the total to Belgium to \$341,455,000.

Brazil and Britain Sign Treaty

Washington. — Advice from Rio Janeiro to the state department reports that an arbitration treaty has been signed by Brazil and Great Britain.

London. — Reuters' facts that some apprehension is felt that the trouble in Egypt, which was fomented by the Egyptian nationalists, may take a Nationalist settlement, may take a religious turn, and that the native tribes may declare a holy war against the British empire.

There is reason to believe that the natives may have been affected by Turkish propagandists, who are in no way friendly towards British. Steps are being taken to deal with this possibility.

The official press bureau issued the following statement:

"General Allenby reports that a new ministry has been formed in Egypt with Hussein Rudi Pasha as president of the council."

"The provinces are quiet, but demonstrations by the peasants have occurred at some places. There were disturbances in parts of Cairo on April 9, the feature being hostility towards Armenians by parties of roustabouts."

Why Can't I Get To Sleep?

Thousands of people all over the country ask this question, but still continue to toss and turn on a sleepless bed, and it is impossible for them to get a full night's refreshing sleep.

Some constitutional disturbance, worry or disease has so debilitated and irritated the nervous system that the brain is unable to rest, and the pernicious use of opiates or narcotics, again, you have heart palpitation, and sensation of shivering, a feeling you are going to die, or perhaps you wake up in your bed feeling as though you were about to choke or smother, and the only way you can get relief is to sit up in bed. To all who are afflicted with Milburn's Heart and Nerve Pills offer an inestimable boon. They bring back the much-needed night's rest by improving the tone of the nerves, strengthening the heart, regulating the blood and making the whole organism sleep as peacefully as a child.

Dr. Jas. Latimer, 39 Leicester St., St. John, N.B., writes: "At night I could not sleep. I had to sit up in my heart beat so fast, and when I walked up stairs I would get all out of breath. I tried Milburn's Heart and Nerve Pills and after using two boxes I can sleep all night and am not out of breath after walking."

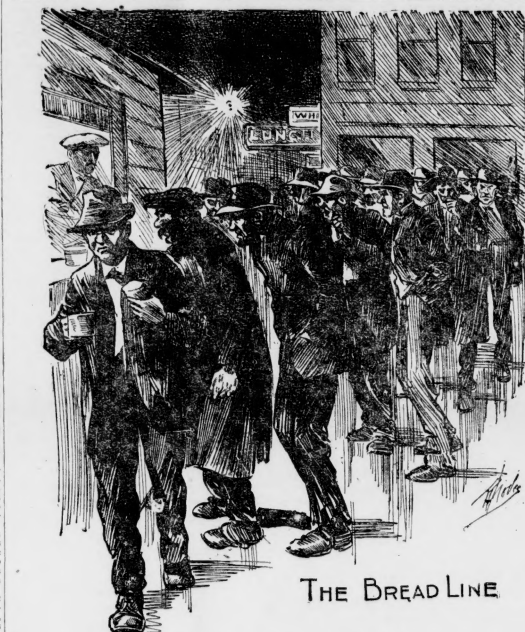

Milburn's Heart and Nerve Pills are 50c a box at all dealers, or mail-order receipt price by The T. Milburn Co., Limited, Toronto, Ont.

London Will Observe Anzac Day

London. — On Anzac Day, April 25, there will be a triumphal march of Australian troops through London. The detachment will number 100 men, who will march from the West End, passing the Mansion House, where the Lord Mayor will take the salute.

Grain Steamers Will Use Rhine

Berlin. — An arrangement has been made with the allies by which grain steamers for Switzerland, coming from across the Atlantic, will pass down the Rhine to Strasbourg or Basel. Consequently the next grain steamers for Switzerland will go to Antwerp.

THE BREAD LINE

Who's In The Bread Line?

There would be no bread lines in the big city if we who live in the country towns did our duty by one another. You and I can do our part to break that bread line—to break up that appalling congestion in which men must either beg or starve. Remember: The bread line of the big city is recruited from the country. Our town has its duty to do. Our community can solve this problem. Industry should be plentiful in the country towns. But industry can't flourish here if we send our money to build up the big city. If all of us all the time spent all of our money in our home towns there would be no bread lines in the big city. Each home town would then take care of its own. Let you and me do our part.

Troops Threatened Mutiny

American Infantry Refused to Fight Bolsheviks

Washington. — The war department has issued an official statement confirming Associated Press advices from Archangel that what amounted to a mutiny occurred among the American troops there on March 30. A company of infantry, the message stated, refused to entrain for the front until personally required to do so by Col. George Stewart, commanding the American contingent. Open threats were made of a general mutiny unless a definite statement was given by Washington insuring an early withdrawal was forthcoming.

New Use for Poison Gas

Paris. Poison gas that worked such havoc during the war will be utilized for a very far different and beneficial purpose in the future, it was announced in scientific circles. Gabriel Bertrand, of the Pasteur Institute, informed the Academie of Sciences that he had discovered a method by which such gas might be supplied for the destruction of caterpillars and in insect larvae which had worked destruction of tree growth in the country districts during the past few years.

Must Pay For Hotel

Crown Owes Rent for Property Occupied for War Purpose

London. — The court of appeals, by a majority, has allowed the appeal of Dr. Kroyer's Hotel, London, in a test action against the crown, who had requisitioned the premises, for payment of rent and for compensation during nine months' occupation by the crown. It was argued that the King was empowered to take a subject's property for the defence of the realm without payment. The master of the rolls decided there was no prospective right to seize his property for administrative purposes in connection with the defence of the realm without indemnifying the owners.

Hans Cannot Pay For Food

Berlin. — The shortage of coal, owing to strikes, is given officially as the reason for Germany's inability to continue payments for entente food supplies now arriving, since coal was chiefly relied upon as a means to settle this indebtedness. The announcement adds that coal production has fallen to such a low level that the manufacture of articles wanted abroad. "German economic life must collapse before autumn, and the food condition will be worse than ever."

Fall of Odessa

Will Aid Bolsheviks

Paris. — The chief cause of anxiety in connection with the occupation of Odessa by the allies and its first that most fertile regions in southern Russia have fallen into the hands of the Bolsheviks forces, giving them immense resources of grain, coal and minerals.

The reason for the allies' retirement was the constantly increasing menace of the Bolsheviks' military against the allied garrison, which was able to maintain its supplies with greatest difficulty. The commander thereupon decided to withdraw his troops, numbering approximately 50,000. The troops retired to Rumania and Constantinople.

The situation in Rumania and Poland is far from reassuring, even with these additional troops to help form a cordon against the spread of Bolshevik. Both Rumanians and Poles require the largest measure of aid from the allies providing them with food, military equipment and organization. It is regarded as essential in the most important quarters that General Haller's Polish divisions should be hurried eastward as soon as possible, for, otherwise, it is pointed out, there is a possibility of the formation of a great Bolshevik block consisting of Lithuania, Poland and Rumania, which would be so powerful that immense forces would be required to resist it.

Statements of various countries gathered in Paris, discussed the Odessa question with considerable importance and it was explained that it would form the subject of discussion among the delegates to the peace conference.

Ex-Kaiser Will Be Brought To Trial

Paris. — The responsibility of the German emperor for the war and the means for bringing him to trial by one of the allied governments, probably Belgium, had been definitely decided upon by the council of four. This follows the definite decision on the terms of reparations for war damages, whereby \$10,000,000,000 must be paid within the next two years, and an inter-allied commission assess the remaining damage for a period of thirty years, beginning May, 1921.

Thus, two of the great obstacles which stood in the path of the rapid attainment of peace have been removed, and the period of extreme tension over the taxation and the failure to secure tangible results is succeeded by revived confidence over the great advance towards a permanent settlement.

The council of four has reached an agreement on the Saar valley. The valley unchanged but accords to agreement leave sovereignty over France free of duty sufficient coal for the Lorraine iron industry and to replace the production of the mi-

destroyed in the Lens mining district, with the privilege to the Germans of restoring Lens mines and thus relieving the Saar valley of this charge.

This agreement removes one of the most difficult obstacles to the conclusion of peace. While the tension has been greatly reduced, it is not entirely removed, such depends on the continuation of progress with respect to the remaining obligations, notably the Saar valley, the Rhine frontier, the Adriatic issue, and a few other of final agreement.

The agreement on responsibility for the war must continue to have called for compromise between divided reports presented by the commission of which Secretary Lansing is chairman. There was a practical agreement on the general responsibility of the German emperor for bringing on the war, but division existed as to whether it was feasible to bring him to justice before an international tribunal.

SERVICE THAT SATISFIES

A famous tractor—the Fordson

THE Fordson tractor has attracted the attention of every civilized country. It is used by thousands in Europe today. It has shown the way to make farms produce more—in every country—and of every size.

Build right—simple, durable, economical, easy to operate—easy

to care for; the Fordson fulfills every requirement. It will make your farm a more profitable investment—will take worries off your shoulders.

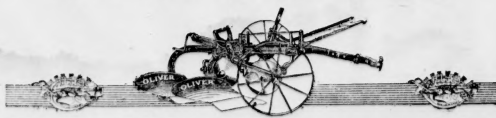

Burns kerosene—all gears are enclosed. The Fordson is built especially to meet the need for a tractor which must be cared for by the operator himself.

Use it with the Oliver No. 7 Plow

Good plowing—every acre exactly as you want it—that's the result of using the Oliver No. 7 Plow especially designed for the Fordson tractor. Trash and weeds are buried at the bottom of the furrow; the stop device maintains an even depth of furrow. It's the plow that works to the best advantage with this tractor.

Come in and let us show you the Fordson tractor and Oliver plow.
